Detailed Description

Claims

English Abstract

...based transaction facility are described. In one embodiment, the method includes receiving a request to cancel feedback pertaining to a transaction in a network-based transaction facility from a first party to...

...satisfies the cancellation criteria (710), present to the second party details about the transaction and feedback (714) and receive

confirmation from the second party to cancel the feedback (716), and cancel the feedback (720).

SUMMARY OF THE INVENTION

An exemplary method includes receiving a request to cancel feedback pertaining to a transaction in a network-based transaction facility from a first party to...

...for each entry, data specifying whether feedback exists for the relevant transaction and whether this feedback is current (i.e., has not been cancelled).

It should be noted that, in one embodiment, an entry is only created in the...

...or opinion. A type column 108, in one embodiment, stores indication as to whether the comment is positive, negative, neutral, or withdrawn . A date column 110 stores, for each entry, the date on which the feedback...

The feedback details table 53 also includes a withdrawal date column 120 that stores, for each withdrawn feedback comment , the date on which this feedback comment was withdrawn .

<removed unnecessary information>

...a processor, cause the processor to perform a method characterized by: receiving a request to cancel feedback pertaining to a transaction in a network-based transaction facility from a first party to the transaction; determining that a second party to the transaction agrees to cancel the feedback pertaining to the transaction; determining whether one or more feedback cancellation criteria are satisfied; and...

Assignee name & address:

Original Abstracts:

A request to cancel feedback pertaining to a transaction in a network-based transaction facility is generated when a user submitting the feedback has...

...dispute resolution process or other process of the facility. In another embodiment, a request to cancel such feedback is generated when a user submitting the feedback has been suspended from the facility within a certain time period of that user's initial use of the...

Claims:

What is claimed is: 1. An apparatus comprising: a feedback cancellation request receiver to receive a request to cancel feedback left by a user pertaining to a transaction in a network-based transaction facility; a feedback cancellation criteria evaluator to determine whether one or more feedback cancellation criteria are satisfied, said...

...whether said user has been indefinitely suspended within said certain time period of leaving said feedback; and a feedback cancellation recorder to cancel the feedback pertaining to the transaction if the one or more feedback cancellation criteria are satisfied.
